

Ear Pain

Ear pain has many causes. Often in adult patients, the cause of the ear pain isn't readily apparent. Ear pain can obviously come from ear infections or ear trauma, but chronic ear pain is often from other causes. Some of the more common causes of ear pain are TMJ (temporomandibular joint dysfunction), dental problems, salivary gland infections and tumors, tonsillitis, throat cancers, sinus infections, etc...

Our team of specialists can listen and work with you to help sort out the cause of your chronic ear pain.
